

Collimated light source GW-CSFB-10 specification sheet

Overview

Spectral curve

Product parameters

ITEM	Parameters
Light source illuminance	100lux @2m
Light output power of the light source	Continuously adjustable from 0-10mw
Spot size	Ø10mm
Wavelength range of light source	380nm-780nm
Fiber core	100um
The aperture of the collimating mirror	Ø18mm
Light source divergence Angle	±0.5°
Working voltage and current of the light source	24V 0.7A
Electric power of the light source	20W
Light source interface	SMA
